

Conference

Improving the Quality of Family Medicine Training in Sub-Saharan Africa

17-21 November 2008
Cassia Lodge
Kampala - Uganda

Program Primafamed Conference

“Improving the Quality of Family Medicine Training in Sub-Saharan Africa”

Karibuni – Welcome all

It is a great pleasure to have so many people from all over Africa and other parts of the world to be together to discuss family medicine training, share knowledge, ideas and experiences, learn from each other and enjoy the participation.

We all agree family medicine as part of primary health care is of utmost importance in delivering accessible, affordable, equitable and quality health care for all. Developing quality training for the new generation of doctors is an essential part of this.

One of the our main goals for the conference is the South-South cooperation; the formation of a network in Africa, between people, universities, organizations. There is a lot of information among us, sharing is gaining. Together each of us can develop the training that fits in the context of the specific country.

We hope you will have an interesting and fruitful time at the conference this week and that you will take a lot of useful information back to your workplace to share with your colleagues, students, patients and communities.

Yours sincerely,

Maaïke Flinkenflögel
Primafamed coordinator
Conference organizer

Jan De Maeseneer
Primafamed Promoter
